Biden’s choices are aimed to please

His Cabinet and other appointments signal a diverse balance that may appease the GOP and his divided party.

By Darby Sturgis

WASHINGTON — Despite Donald Trump’s denuncia- tions that Joe Biden’s coalition would collapse as soon as he leaves the White House, the new president-elect’s nominees are already filling a roster that will be suffering buyer’s remorse. 

Biden is poised to nominate Yellen to run the U.S. Treasury Department, one of the most powerful positions in government. The pick is no small task. While there are a few favorites, the job is daunting and the president-elect has also signaled a renewed interest in advancing his agenda.

Yellen, a former Federal Reserve head, is a strong candidate to be Treasury secretary. She is respected for her expertise in macroeconomic policy and has a long history of working with the financial sector. She is expected to face scrutiny from Capitol Hill over her role in managing the financial crisis in 2008.

Democrats are looking to Yellen to help push through a range of proposals, including climate change and infrastructure legislation. They are also counting on her to manage the economic recovery from the pandemic.

But Biden’s initial Cabinet selections and other senior appointments have been a mixed bag as well. Despite some strong candidates, there have been concerns about diversity and experience. One of Biden’s favorites, Janet Yellen, was named to be Treasury secretary. She is a seasoned economist and has served as the Federal Reserve Board Chair as well as the Secretary of the Treasury under President Barack Obama.

The president-elect has also signaled a renewed interest in advancing his agenda. He has promised an array of proposals, including a $1.9 trillion infrastructure package and a $1.9 trillion health care package. He has also vowed to address climate change and racial inequality.

Despite the challenges, Biden’s nominees have been praised for their qualifications and experience. Some, like Yellen, have a strong background in economics and finance. Others, like Denis McDonough, who was named as secretary of veterans affairs, have a record of serving in government.

However, some have raised concerns about diversity and experience. Some have called for more candidates of color and women to be considered. Others have questioned the qualifications of some of Biden’s picks.

In the end, Biden’s nominees are likely to face a tough confirmation battle in the Senate. Republicans are expected to oppose some of his picks, particularly those with strong ties to the Obama administration.
