**Trump vows to save America from Biden**

By John Wildermuth

In a dark declaration of war against Joe Biden and the Democrats, President Trump declared Thursday that the November election “will decide whether we save the American dream or whether we allow a socialist agenda to demolish our cherished destiny.”

His speech accepting the Republican nomination before hundreds of supporters on the South Lawn of the White House — an unprecedented campaign setting that critics called an illegal use of govern­ment property — was a take­off on pro­nuclear calls to battle for the fall campaign.

In his 23 ½­minute­nomination acceptance address to the Democratic convention last week, Biden never mentioned the president by name, but he called him out because, he said, “President continues on A9”
